State-of-the-art Denon Solutions for Maximising Content Quality

Fully discrete, identical quality and power for all 5 channels (120 W x 5 ch)

To faithfully reproduce the original surround sound, each of the AVR-1612's 5 channels is equipped with the same power amp of equal power. Since these power amps also use discrete circuits configured with parts strictly selected for their contribution to high sound quality, rather than with low-cost integrated circuits (ICs), the surround sound playback is of impeccably high quality.

Featuring 3D pass-through technology

By connecting a 3D-compliant Blu-ray disc player and 3D-compliant TV to the AVR-1612, you will have a 3D home theatre where you can enjoy high-definition sound and video on a level you've never experienced before.

High-definition audio support

The AVR-1612 has a decoder that supports Dolby TrueHD and DTS-HD Master Audio, another high-grade digital audio format.

Minimum Signal Path for clear audio and video signal

Signal paths are as short as possible to keep signal degradation in the audio and video circuitry to an absolute minimum.

Direct Mechanical Ground Construction

Vibration-resistant construction has been reviewed to thoroughly suppress the adverse influences of vibration on sound quality. E.g. the power transformer has been securely mounted on the highly rigid bottom chassis.

Compressed Audio Restorer to enhance digital music files

Compressed Audio Restorer is Denon technology that restores compressed music sources to their original precompressed quality to give you a lively sonic ambience with greater detail and depth.

Connectivity & Future-ready Expandability

Supports HDMI (V.1.4a with 3D, Audio Return Channel) Deep Color, "x.v.Color", Auto Lipsync and HDMI control function

The AVR-1612 provides 4x HDMI inputs and 1x output that let you simultaneously connect a variety of HDMI-equipped devices such as a game console and HD video camera as well as Blu-ray disc player.

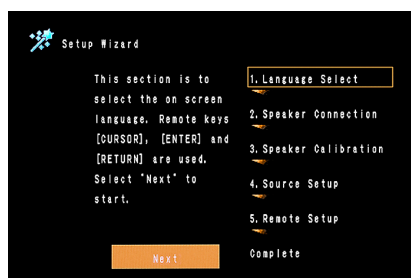

- USB front input works with iPhone and iPod touch Quick connection of iDevices and easy control via remote handset.
